

VIJAYMAL YADAV

Data Science & Machine Learning Engineer | Python Developer | Web Developer

Varanasi, Uttar Pradesh | 7080410703 | babhanaval@gmail.com | github.com/vijaymal99 | linkedin.com/in/vijaymal-yadav-3b745130b

PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience in Machine Learning, Data Science, Backend Development, and REST API development. Proficient in Python, SQL, JavaScript, Node.js, MongoDB, Pandas, NumPy, Scikit-Learn, and Deep Learning frameworks including CNN-based image classification. Built AI-powered applications and contributed to startup backend systems. Passionate about solving real-world problems through Data Science, AI/ML, and Software Development.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, C++, C

Data Science / ML: NumPy, Pandas, Matplotlib, Scikit-Learn, OpenCV, CNN (Convolutional Neural Networks)

Deep Learning: Image Classification, Feature Extraction, Model Training & Evaluation

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL, SQLite

Tools: Git, GitHub, VS Code

Core CS: DSA, DBMS, OOPs, Operating Systems, Computer Networks

PROJECTS

Spam Email Detection System

Python | Naive Bayes | NLP | Streamlit

github.com/vijaymal99/Spam-Email-Detector

- Developed a Spam Email Detection System using Naive Bayes Classification.
- Implemented text preprocessing, Bag of Words, and probability-based email classification.
- Achieved 90.62% accuracy and evaluated performance using Precision, Recall, and F1-Score.
- Built a Streamlit-based UI for interactive spam detection.

AI Skin Disease Detection System

Python | CNN | OpenCV | Scikit-Learn | Image Processing

github.com/vijaymal99/SkinAI

- Built a CNN-based image classification model to detect and categorize skin diseases from images.
- Implemented image preprocessing pipeline including resizing, normalization, and augmentation using OpenCV.
- Developed feature extraction and prediction workflows achieving reliable classification across multiple disease categories.

Student Skill Recommendation Platform

Python | Machine Learning | Recommendation System

- Designed an intelligent recommendation system suggesting personalized skills, tools, and learning roadmaps.
- Built interest-to-career-goal mapping logic using ML-based filtering and rule-based heuristics.
- Improved student onboarding experience by delivering structured, goal-oriented guidance.

Quickoline Startup – Backend Contributor

Node.js | Express.js | MongoDB | REST APIs

github.com/viratech07/Quickoline-Master-Backend

- Developed and integrated scalable REST APIs using Node.js and Express.js for core startup features.
- Handled database operations, business logic implementation, and end-to-end feature integration.
- Conducted API testing and debugging to ensure system reliability and performance.

EDUCATION

B.Tech – Computer Science Engineering

Veer Bahadur Singh Purvanchal University | 2023 – 2027 (Expected)

- Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOPs

CERTIFICATIONS & ACHIEVEMENTS

- Python for Data Science – Coursera / NPTEL
- SQL & DBMS Fundamentals
- Participant – Bharat Innovation Conclave 2025
