

VIJAYMAL YADAV

Data Science & ML Engineer | Python Developer

Varanasi, UP | 7080410703 | babhanaval@gmail.com | github.com/vijaymal99 | linkedin.com/in/vijaymal-yadav-3b745130b | portfolio-pied-nu-62.vercel.app

PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience in Machine Learning, Data Science, and REST API development. Proficient in Python, SQL, Pandas, NumPy, and Scikit-Learn, with projects in classification, NLP, and CNN-based image classification, deployed as interactive Streamlit applications. Also contributed to a startup backend using Node.js and MongoDB. Passionate about solving real-world problems through Data Science and AI/ML.

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript, C++, C
Data Science / ML	Pandas, NumPy, Scikit-Learn, Matplotlib, EDA, Classification, Feature Engineering, Model Evaluation, OpenCV, CNN
Deployment / Tools	Streamlit, Streamlit Cloud, Joblib, Git, GitHub, VS Code
Backend	Node.js, Express.js, REST APIs
Databases	MongoDB, MySQL, SQLite
Core CS	DSA, DBMS, OOPs, Operating Systems, Computer Networks

PROJECTS

CreditWise – Loan Prediction System | [GitHub](#) | [Live Demo](#)

Python | Pandas | NumPy | Scikit-learn | Joblib | Streamlit | EDA | Classification | Machine Learning

- Developed an end-to-end supervised Machine Learning pipeline in Python to predict loan approval, including data cleaning, EDA, missing-value handling, categorical encoding, and feature scaling with StandardScaler.
- Implemented and compared K-Nearest Neighbors, Logistic Regression, and Naive Bayes classifiers using Scikit-learn.
- Evaluated models using Accuracy, Precision, Recall, F1-Score, and Confusion Matrix; saved trained models and preprocessing objects with Joblib.
- Deployed an interactive Streamlit web application on Streamlit Cloud for real-time loan prediction.

Spam Email Detection System | [GitHub](#)

Python | Naive Bayes | NLP | Streamlit

- Developed a spam email classifier using Naive Bayes with text preprocessing and Bag of Words features.
- Achieved 90.62% accuracy; evaluated using Precision, Recall, and F1-Score.
- Built a Streamlit-based UI for interactive spam detection.

AI Skin Disease Detection System | [GitHub](#)

Python | CNN | OpenCV | Scikit-Learn | Image Processing

- Built a CNN-based image classification model to detect and categorize skin diseases from images.
- Implemented an image preprocessing pipeline (resizing, normalization, augmentation) using OpenCV.
- Developed feature extraction and prediction workflows for multi-class classification.

Quickoline Startup – Backend Contributor | [GitHub](#)

Node.js | Express.js | MongoDB | REST APIs

- Developed and integrated REST APIs using Node.js and Express.js for core startup features.
- Implemented database operations and business logic; performed API testing and debugging.

EDUCATION

B.Tech – Computer Science Engineering

2023 – 2027 (Expected)

Veer Bahadur Singh Purvanchal University

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOPs
